TABLE OF CONTENTS

		PAGE
Morphology and anatomy of the fruit of *Hicoria pecan*. Contributions from the Hull Botanical Laboratory **427** (with forty-five figures) - - -	*Donald V. Shuhart*	1
Effect of ultraviolet radiation on growth and respiration of pea seeds, with notes on statistics. Contributions from the Hull Botanical Laboratory **428** (with one figure) - - - - - - - - -	*Mortimer P. Masure*	21
Microsporogenesis and embryogeny in certain species of *Bromus* (with twenty-nine figures) -	*Percilee Beck and Jerome S. Horton*	42
Diagnostic characteristics of the xylem of the North American *Abies* (with sixteen figures) - - -	*E. G. Wiesehuegel*	55
Morphology of the sporophyte of *Riccia crystallina*. Contributions from the Hull Botanical Laboratory **429** (with twenty-four figures) - - - -	*F. M. Pagan*	71
Moisture content and high temperature in relation to the germination of corn and wheat grains (with four figures) - - - - - - - - - - - -	*Wm. J. Robbins and Karl F. Petsch*	85
Origin and structure of the secondary root of *Sagittaria*. Contributions from the Hull Botanical Laboratory **430** (with twenty figures) - - -	*Charles F. Severin*	93
A bisporangiate cone of *Tsuga canadensis* (with three figures) - - - - - - - - - - - -	*Stella Holmes*	100
A new species of *Anthoceros* from Rangoon (with six figures) - - - - - - - - - - - - - -	*L. P. Khanna*	103
Ecology and relative importance of the dominants of tall-grass prairie (with thirty figures) - - -	*J. E. Weaver and T. J. Fitzpatrick*	113
Structure of seedlike fructifications found in coal balls from Harrisburg, Illinois. Contributions from the Hull Botanical Laboratory **431** (with twenty-one figures) - - - - - - - - - -	*Harriette Valletta Krick*	151

PAGE

Pinoxylon dakotense Knowlton from the Cretaceous of the Black Hills (with twelve figures) - - - *Charles B. Read* 173

Nature and development of the tracheids of the Ophioglossaceae (with twenty-four figures) - - *Gasper A. Loughridge* 188

Meiosis in the genus *Hypericum* (with plate I) - - *Carl Sherman Hoar and Edwin Jacob Haertl* 197

Carpel dehiscence in *Firmiana simplex*. Contributions from the Hull Botanical Laboratory **432** (with nine figures) - - - - - - - - - - *Tsu-Kiang Yen* 205

Studies in the genus *Bidens*. X. Family Compositae. Contributions from the Hull Botanical Laboratory **433** - - - - - - - - - - - *Earl Edward Sherff* 213

The suspensor of *Cryptomeria japonica* (with seven figures) - - - - - - - - - - - - - *John T. Buchholz* 221

Another haploid *Nicotiana tabacum* plant (with four figures) - - - - - - - - - - - - - *Francis A. McCray* 227

Anatomy of the axis of the banana (with ten figures) *Alexander F. Skutch* 233

Anatomy and microchemistry of the cotton seed (with twenty-one figures) - - - - - - - - *R. G. Reeves and C. C. Valle* 259

Microsporogenesis and chromosome behavior in *Nothoscordum bivalve*. Contributions from the Hull Botanical Laboratory **434** (with plates II, III and three figures) - - - - - - - - - - *John M. Beal* 278

The origin and behavior of chiasmata. I. Diploid and tetraploid *Tulipa* (with ten figures) - - - *C. D. Darlington and E. K. Janaki Ammal* 296

Significance of chromosome behavior during diakinesis in *Oenothera* (with sixteen figures) - - *J. Theron Illick* 313

Annual rings of *Thuja occidentalis* in relation to climatic conditions and movement of sand (with six figures) - - - - - - - - - - - - - *Florence Wolfe* 328

Buesia, a new subgenus of *Hymenophyllum* from Peru (with one figure) - - - - - - - - - *C. V. Morton* 336

Softening of the seeds of *Melilotus alba* (with plates IV, V and four figures) - - - - - - - - - *Douglas H. Hamly* 345

PAGE

Irregularities in the rate of absorption by dry plant tissues. Contributions from the Hull Botanical Laboratory **435** (with thirteen figures) - - - *Charles A. Shull and S. P. Shull* 376

The seedling anatomy of *Ipomoea batatas*. Contributions from the Hull Botanical Laboratory **436** (with plates VI, VII and twelve figures) - - - *Herman E. Hayward* 400

Systematic position of the slime molds and its bearing on the classification of the fungi - - - - *G. W. Martin* 421

Ecological aspects of transpiration. I. Pike's Peak region: climatic aspects. Contributions from the Hull Botanical Laboratory **437** (with eight figures) - - - - - - - - - - - - - - *Charles J. Whitfield* 436

Osmotic pressure of leaves of *Pinus scopulorum*, and certain environmental factors (with three figures) *J. Fisher Stanfield* 453

Relative transpiration rates in citrus leaves (with four figures) - - - - - - - - - - - - *A. R. C. Haas and F. F. Halma* 466

Life history of *Nymphoides peltatum* (with twenty-three figures) - - - - - - - - - - - *Ernest L. Stover* 474

Composition of the fiber and waste of *Agave lechuguilla* - - - - - - - - - - - - - *Robert A. Greene* 484

BRIEFER ARTICLES—

Chromosomes of *Nothoscordum bivalve* - - - *John M. Beal* 105

Some subarborescent species of *Nicotiana* - - *T. H. Goodspeed* 340

Miocene insect gall impressions (with one figure) *Arnold D. Hoffman* 341
